**Examiner's Comment**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on April 16, 2007 has been entered. Claims 1, 5, 6, 9, 13-28, 30-39 and 42-55 are pending.

The following is an examiner's statement of reasons for allowance: The closest prior art is PGPub document 20020157122. However, the specific deletion of exons 4-8 of the BACE-1 gene is not taught, nor is the use of frt/flp recombinase system for disrupting the BACE-1 gene taught. In the IDS filed April 16, 2007, three references directly related to the present claims: Cai et al, 2000; Cai et al, 2001; and Luo et al. 2001. First, none of these references were published prior to applicant's earliest priority date, February 23, 2000. Second, none of these references disclose the claimed invention of deleting exons 4-8 of BACE-1 or recombination using the frt/flp recombinase system. Thus, the claimed invention is free of the prior art. The prior art at the time of filing did not teach or suggest the claimed invention.

Any comments necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
